Foreword

The Islamia University of Bahawalpur (IUB), Pakistan has since long (1975) been catering excellence in academics/ research in perspective to the socioeconomic profile of the South Punjab region. Resultantly, with more than 140 departments and more than 60000 student strength, it has paved up its way as one of the top universities of Pakistan as indicated through various most influential global rankings such as QS and Times Higher Education.

Research at any university serves the purpose of enhancing knowledge, leading to innovation and success, improving the quality of education and life, helping find truth, and allowing for continuous improvement. This ultimately plays role in socioeconomic profile of the country in general, and the region in specific. One of the prerequisites of all research students/scholars is devising and drafting a thesis/dissertation which truly demonstrates analytical abilities, critical thinking, and capacity for independent study. This draft caters a beacon of knowledge contributing towards the relevant field of study and hence provides a novel finding to specific or a general reader.

In the present competitive global scenario of research, the new 'IUB Theses/Synopses Guidelines-2023' are hereby being officialized as a uniformity tool for all the departments of IUB to be implemented in letter and spirit.

Prof. Dr. Naveed Akhter
Vice Chancellor

Preface

The 'Guidelines for Proposal/Synopsis & Thesis Preparation' were initially drafted as per the copyright of the Islamia University of Bahawalpur (IUB) 2014 under the patronage of the erstwhile vice-chancellor Prof. Dr. Saleem Tariq Khan and the Director, Advanced Studies and Research (Director AS&R), IUB Prof. Dr. Mahmood Ahmad. The document being comprehensive and perceptible, served its purpose of bringing uniformity in thesis/synopsis writing within all the departments/programs of the IUB in a most positive direction. However, time witnessed that with the passage of time, its implementation declined. Resultantly, at the time of writing this, consistency in formatting and styling of theses/synopses by the students even of the same department is lacking at IUB. Keeping in perspective this fissure, the vice-chancellor Prof. Dr. Naveed Akhter constituted a committee spearheaded by Prof. Dr. Saeed Ahmad and Prof. Dr. Umer Farooq to revamp the existing guidelines and get them implement at IUB.

The resultant new 'IUB Theses/Synopses Guidelines-2023' are hereby being officialized with the main objective to get it implemented in true letter and spirit across the IUB for uniformity in preparation of science documents, and to assist the research students (of BS with research, MPhil/MS/MSc (Hons)/MBA/LLM and PhD Programs) to prepare their theses/dissertations/synopses in complete uniformity throughout IUB. This uniformity in science documents will not only enhance the global identity of IUB but will also provide ease to reviewers/external examiners. The Departmental Research Committees (DRCs) of each department of the IUB may initially scrutinize the theses/dissertations/synopses for compliance with 'IUB Theses/Synopses Guidelines-2023' and mention the status of each thesis/synopsis in their Meeting Minutes, which may be forwarded to the Directorate of Advanced Studies and Research along with the thesis/dissertation.

It is positively hoped that a strict implementation of these guidelines at each department of the IUB will cater a scientifically-oriented academic community and an enhanced research quality.

The non-structured abstracts will be incorporated. However, for the sake or ease of the reviewer/examiner/reader, it must be a single paragraph (not more than 500 words) and must be drafted under themes of background, objective(s), methodology, results, and conclusions. The font of the abstract must be TNR 12, regular and justified. Appropriate keywords (3 to 5) must be given at the end of the abstract. As the keywords are being used globally by all the international bibliographies/scholarly search engines, hence this will increase the visibility and resultant citing of the thesis/dissertation.

Chapter 1

Introduction

1.1 Background

The introduction of a science document introduces the title of the research work and its allied aspects hence preparing the reader for the rest of the document. As it is the first part of the document and is about to set the tone, it should be catchy to the reader's/reviewer's eye.

Sub-Heading-I Should Be in Title Case, Font Size 14, Bold, Line Spacing: 1.15, Spacing After Paragraph: 6 Pt, TNR, Justified

1.2 Instructions

For Urdu Sub-Heading-I Should Be in Title Case. Font Size Jameel Noori:20 Centralized, Line spacing 1.15, Justified

The introduction chapter should present an introduction to the topic in a clear and concise manner. In addition, it may also give an overview of the main themes as well as terms that have been addressed in the research work. It must be kept in mind that the introduction chapter should not be a mere literature review. However, it may put forth a clear research gap through a few prominent past pieces of research in that area. Having created a research gap, it should clearly mention the objectives of the research/study (research objectives may be written in bulleted form or in the form of a paragraph). The introduction chapter should also clearly present the significance of the study, its limitations and strengths, and an overview of the whole thesis.

The chapter may be divided into title/research work.

Sub-Heading-II Should Be in Title Case, Font Size 13, Bold, Line Spacing: 1.15, Spacing After Paragraph: 6 Pt, TNR, Justified

1.2.1 Must-haves

For Urdu Sub-Heading-I Should Be in Title Case. Font Size Jameel Noori:18 Centralized, Line spacing 1.15, Justified

The following subheadings must,

- Background
- Statement of Problem
- Significance of the Study
- The Hypothesis of the Study
- Novelty Statement
- Objectives (Bulleted)

1.2.1.1 Sub-Heading-III

All Sub-Headings-III and subsequent Sub-Headings must be in TNR, font size 12, bold, justified, 0 Pt spacing before paragraph and 6 Pt spacing after paragraph.

Chapter 2

Review of Literature

2.1 Importance

Within the circles of prominent global Science Writers, it has lately been established that gradually this chapter, which once used to play a pivotal role in establishing a research gap/hypothesis, is now losing its footing in the present-day world of research. The research students/scholars normally copy and paste the abstracts of past research work/research articles without giving them a robust shape. It is pertinent that the supervisors may inculcate the importance of the scope/need of this chapter to their research students.

2.2 Purpose

This chapter mainly serves a two-fold purpose that is a) to sum up the past work conducted on similar aspects of research and b) to create a research gap for the research study being conducted. However, normally it is noticed that the students/scholars only cover the first purpose without attaining the second purpose in true spirits.

2.3 Instructions

The literature review must not be written in an ‘author-based style’ in which each paragraph begins with an authors’ name with the whole of the copied abstract from a research article. Instead a ‘**Narrative Literature Review**’ with appropriate subheadings must be written in a way that a clear and concise research gap/hypothesis is deduced. The literature review must be written in an argumentative manner thus identifying a logical research gap in the relevant field/subject. It will not only strengthen the hypothesis but will also lead to a clarified answer to the research question as an outcome.

The research cited and incorporated in this chapter must be the latest, that is, it **must have been conducted in the last ten (10) years**, until and unless the supervisor deems it necessary to incorporate older references due to the paucity of research in that specific area/subject. Only international research work may not only be incorporated into this chapter. For creating an appropriate research gap/hypothesis, it is inevitable that the local research (research conducted in Pakistan) may also be cited/incorporated. The supervisors may make sure that research in that area/subject conducted in Pakistan has been incorporated. It is normally noticed that this chapter only contains references/research works conducted in other countries and it altogether omits national research works. In this regard, a subheading of ‘**Work Conducted in Pakistan**’ may be a good option to adopt. The research scholars may be updated about the primary, secondary and tertiary literature. And it may be made sure that only primary and secondary literature is used in the document.

Research Gap/Hypothesis must be written in at least one paragraph at the end of the chapter.

Chapter 3

Materials and Methods/Data and Methodology

3.1 Background

A research methodology gives research legitimacy and provides scientifically sound findings. It also provides a detailed plan that helps to keep researchers on track, making the process smooth, effective and manageable. Vague and unclear information in this chapter means that the results and the deduced conclusions are not credible at all.

3.2 Instructions

The chapter may be devised in such a way that the research methodology is elaborative and reproducible. Furthermore, wherever needed, it should be supported by appropriate references both from the field of methodology in particular and research the literature in general. This section may have references older than those of the last ten (10) years as certain techniques/methods were originally described quite earlier in the history of science.

A scientific pattern of writing may be implemented strictly such as the use of chemicals, equipment *etc.* may be given along with their brand names, model numbers, CAT numbers, country of origin *etc.* If proformas are utilized for surveys, the proformas may be tested for validity before their dissemination for research. Supervisor of each area/subject may make it inevitable that the methodology of the research work is at par with past research work and is in line with the rules set by the patterns of academic and science writing.

3.3. Must-haves

The chapter must include following appropriate sub-headings:

- A brief account of research paradigm/Traditions and approaches

- Research design/Model specification

- Geo-location of the study

- Location of sampling

- Location of laboratory (if any)

- Study animals/Subjects/Population/Sample number

- Sampling technique/Data collection procedures

- Study attributes/Parameters

- Research methodology (detailed)

- Data analysis procedures (detailed)

Note: The above given list of subheadings is inexhaustible and tentative. Sub-headings may be added/deleted as per demand of the subject area/research area.

Chapter 4

Results

4.1 Instructions

The chapter may be kept separate from the chapter of 'Discussion'. **However, it may be merged with Discussion as per the need of the subject/research.** Results may be given in the form of text, tables or/and figures. However, redundancy may be avoided. If a parameter or a set of parameters has been presented in tabulated form, then there is no need to give it in a figurative form.

Results should be written in a clear, concise and logical way. Statistical representations may be incorporated wherever needed. For example, a 'statistical difference' may immediately be followed by the level of significance in parenthesis as ($P \leq 0.05$). Statistical and non-statistical results must be elaborated in detail. In addition, if needed, the interpretations may also be incorporated.

Care must be given that the chapter may not contain any sentence pertaining to the chapter of 'Methodology'. This chapter may be merged with the Discussion chapter as per the need of the subject/research are.

4.2 Incorporation of Tables

All the tables must be numbered as per their respective chapters, *e.g.* Table 4.1., 4.2. *etc* and must be appropriately cited in the text. Table number (*e.g.* 4.2) must be given in bold and in one line, and its title in another, justified on the left. An appropriate caption (title-cased) may be given above the table which must be TNR 11, left aligned, unbold and single-spaced in case of more than one line. Please see the Table ahead for details (Table 4.1.). All the column headings must be bold and centered. However, the body of the table will be in regular font, centered. The appropriate footnote must be given below the Table, if need be. It must be in TNR 10, regular, left aligned. The abbreviations/acronyms in the Table, if any, must be mentioned in full in the footnote below the Table.

4.3 Incorporation of Figures

All the figures must be numbered as per their respective chapters, *e.g.* Figure 4.1., 4.2. *etc.* and must be appropriately cited in the text. Figure number (*e.g.* 4.7) must be given in bold and in one line, and its title in another, justified on the left. An appropriate caption/legend (title-cased) may be given below the figure which must be TNR 11, left aligned, unbold and single-spaced in case of more than one line. Please see the Figure ahead for details (Figure 4.1.). If the figures are needed to be incorporated in other chapters (apart from results), and they have been taken from some external source then an appropriate source in the form of reference citation may be provided as per the example given in Figure 4.2.

All the figures must be scientifically devised, giving a statistical representation where ever necessary. Error bars *etc* if applicable, may be explained along with the figure caption/legend.

The figures/images should neither be too large nor too small and must fit within the margins of the page.

4.3.1 Large Size Drawings/Charts/Figures/Tables

Any drawing/chart/figure/table, which cannot be accommodated within the margins of thesis page, even with easily legible reduced size, must be prepared on a larger size paper / sheet, which should be folded and enclosed in a special pocket attached permanently inside of the bound back of the thesis.

4.4 Equations

All equations belonging to a chapter in the text should be written using equation tool (in Microsoft Word, Font Style Cambria Math, font size 12, regular), numbered in the same way as the figures and tables (should include chapter number). Each equation should start on a separate line with a larger than the normal spacing between the equation, the equation is aligned centre and equation number is aligned right, e.g.,

$$x^2 + x + 1 = 0 \quad (1.1)$$

The equation should be referred to in the text as Equation 1.1

4.5 Quotations in the Text

A quotation must be written in a separate paragraph, font style TNR, font size 12, italic, should be centered and given in inverted commas. The name of speaker/Quotee will be written in the line next to quote (font style TNR, font size 12, italic).

Chapter 5

Discussion

5.1 Background

This chapter presents the meaning, importance and relevance of the results of the study. It focuses on explaining and evaluating the results of the study, showing how they relate to the previous research work conducted on similar area/subject. Furthermore, it presents an argument in support of the overall conclusion of the study. **It should not be a second results section.**

Care should be taken while drafting this chapter as it may not be a mere repetition of past research as given in the Literature Review chapter.

There are different ways to write this section, but you can focus your writing around these key elements:

- **Summary:** A brief recap of the key results of the study
- **Interpretations:** What do the results of the study mean?
- **Implications:** Why do the results of the study matter?
- **Limitations:** What can't the results of the study tell us?
- **Comparisons:** The results of which past research works are in line with yours and which are different? And give logical reasoning for the differences.
- **Conclusions:** Brief conclusions and recommendation attained from the research work

Conclusions and Recommendations

Conclusions

Reaching the end of the draft, one needs to apprise the reader/reviewer once again of what the whole draft was about. It may be written in the form of a paragraph or bullets.

This part may be written in the following pattern:

1. First, give a brief overview of the problem which was addressed in the research and also give a one-lined methodology conducted
2. Secondly, give specific conclusion(s) emanating from the specific results of the research study
3. Thirdly, present a general and broader conclusion which the results of the study deduce along with limitations of the study
4. Fourthly, give significance as to how the conclusions/results attained in the research work may be of value to any of the stakeholders

Recommendations

This part of the thesis can be written in a good way only if the researcher is aware of the limitations and scope of the research work. The recommendations may be directed towards many stakeholders such as academicians, researchers, policy-makers, government/non-government agencies, farmers, patients, industrialists, *etc.* depending upon the type of research work/area/subject.

It may be written in the form of a paragraph or bullets. And it must be based on specific findings attained from that research only.

III. Literature Cited

The section/part of the thesis chapter will be titled 'Literature Cited' and will contain a list of all references/sources cited in the main text. The following points must be maintained:

1. Each reference cited in the text must be in this list and vice versa which can be made sure through using appropriate reference management software, such as Mendeley or any other updated and reliable software
2. Only primary and secondary sources of literature may be cited until and unless there seems an inevitable need to incorporate tertiary literature too
3. The references of the internet and newspaper may be kept minimal and must not exceed 10% of the total references
4. References must be arranged alphabetically according to the last name of the author and then according to the year
5. Only the APA manual (Latest edition) style of references may be used for referencing. A few commonly used examples have been given ahead in a Quick Guide to APA Style.
6. The font style for reference must be Tnr 12, justified, line spacing: 1.15, paragraph spacing must be kept as 0pt (before and after), left hanging indent of 0.5inches in 2nd and subsequent lines except the first line, as given below:

List of Publications

Any research articles published in peer-reviewed journals or as conference proceedings may be incorporated in bullet form in this section in APA style (Latest Edition).

General Guidelines:

1. The title must be a phrase encompassing all aspects of ‘Science Writing’ and not a sentence
2. Title must be in title-case and not sentence-case
3. While giving results of the study, only one digit after the decimal point such as 2.0 and not 2.052 must be given except where statistical representation makes it necessary to give more than one digit after the decimal such as $P \leq 0.05$, $r = 0.287$, $r^2 = 82.745$ etc.
4. There should be no space between the number and its corresponding symbol e.g. $P \leq 0.05$
5. There should be no space between number and a unit e.g. 25mL, 102mOsm etc.
6. Biological and botanical names, names of species and words such as *etc*, *eg*, *viva voce* and *vice versa* may be italicized.
7. Abbreviations/acronyms must be given in full at their first appearance in each chapter. However, in the rest of the chapter, acronyms must be used.
8. Keep uniformity or consistency in writing throughout the thesis, e.g. uniform font and style of headings, sub-headings, text; English style (British or American); tables; figures/flow charts/graphs; writing references; line spacing, etc
9. The thesis must be balanced in terms of content in various chapters
10. Table of Contents, List of Tables and List of Figures must be auto generated (e.g. built in for Microsoft Word).

Formatting Guidelines:

1. The thesis/synopsis must be typed on one side of an A4-sized paper of at least 80 grams
2. The linespcing throughout the document must be 1.15
3. The paragraph spacing must be kept as 0pt (before) and 6pt (after)
4. If a picture/figure/Table is not covering whole page, then the remaining page must not be left blank. Rather after a spec of three lines, text of next paragraph may be started
5. All the headings/titles of the chapters must be bold, TNR 16, title-cased and centre-aligned. However, the text must be in TNR 12, 1.15 line-spaced, and justified
6. Margins for top, bottom and right side of page must be kept at 0.75 inches, whereas the margin for left/binding side must be 1.5 inches.
7. Page numbers (before start of chapter 1) should be lower-case Roman Numerals such as ii, iii, iv and so forth. They should start with ‘ii’ on the page that appears after the title page. The title page is assumed to be the first page, but remains unnumbered
8. The page numbers (for chapters) must be given at the bottom center of the page in Arabian Numerals (Calibri (Body), font size 11, regular) starting from 1 of Chapter 1.
9. Published work from the manuscript may be given in the appendices at the end of the draft
10. Final form of the thesis will be bound as a permanent form. See Title Pages in beginning of this draft for details

11. Color of hard-bound thesis will be maroon for PhD, Green for MPhil and Black for BS/MSc. Color of writing on hard cover will be silver for MPhil/MSc/BS and golden for PhD
12. For documents other than english, similar formatting guidelines will be followed. However, a separate sample/model will be provided in the final-drafted booklet.

توسب کو مسلسل ایک ہی سطر میں لایا جائے اور درمیان میں سیمی کولن(؛) کی علامت لگائی جائے۔ مثلاً

ابن کثیر، تفسیر القرآن العظیم، 1/ 126؛ ابن حجر، الاستیعاب، 36/2؛ ابن حجر، معرفة الصحابة، 146/1؛ ابن اثیر، اسد الغابة، 451/2

- ایک ہی حوالہ مسلسل یعنی پے در پے دینا مقصود ہو تو ایضاً کے ساتھ صفحہ نمبر لکھنا کافی ہے۔ اسی طرح ایک کتاب کا حوالہ مکمل لکھنے کے بعد مکرر حوالہ دینا مقصود ہو تو صرف مصنف کا مشہور نام یا لقب اور کتاب کے مختصر نام پر اکتفا کیا جائے ناشر، سن اشاعت، اور مصنف کی تفصیل لکھنے کی ضرورت نہیں۔ مثلاً ابن کثیر، تفسیر القرآن العظیم، 126/1
- حوالہ نمبر 1 اور حوالہ نمبر 2 بالکل یکساں ہونے کی صورت میں ایضاً کی اصطلاح استعمال کی جائے۔ اور اگر صفحہ نمبر مختلف ہو تو اس کا نمبر دیا جائے گا مثلاً ایضاً (اگر صفحہ نمبر ایک جیسا ہے) ایضاً، ص 34 (اگر صفحہ نمبر تبدیل ہو تو)
- مقالہ میں مذکور اہم اعلام و اماکن کا مختصر تعارف حاشیہ میں دیا جائے، اس ضمن میں علم الرجال اور الطبقات یا دیگر مستند کتب سے حوالہ بھی دیا جائے۔ مزید برآں یہ کہ فہرست اعلام و اماکن میں صرف ان کا ہی ذکر کیا جائے جن کی تفصیل مقالہ کے حاشیہ میں درج کی گئی ہے، بصورت دیگر فہرست میں محض صفحہ مقالہ نمبر لکھنے کی ضرورت نہیں ہے۔

نتائج بحث (Conclusions)

مقالہ کے اختتام پر ابواب کے بعد فہارس سے پہلے تحقیق کی روشنی میں ثابت ہونے والے نتائج کو نمبر وار لکھیں۔ ان نتائج کی روشنی میں مسئلہ تحقیق کا جواب بھی دیں اور درست فرضیہ (Hypothesis) کی نشان دہی بھی کریں۔ خیال رہے کہ نتائج موضوع سے متعلق ہوں اور ان میں منطقی تسلسل ہو اور وہ نتائج مقالہ کے مشمولات سے اخذ شدہ ہوں۔

سفارشات (Recommendations)

نتائج مقالہ کے بعد مقالہ نگار اپنی تحقیق کی روشنی میں سفارشات بھی مرتب کریں، تاکہ اس بات کا اعتراف ہو کہ زیر بحث عنوان پر حتی الوسع معلومات فراہم کر دی گئی ہیں۔ لیکن یاد رہے کہ علم کی کوئی انتہا نہیں ہو سکتی، خوب سے خوب تر کی گنجائش ہمیشہ رہتی ہے۔ اس لئے سفارشات کی روشنی میں اس پر مزید کام کیا جاسکتا ہے۔ اور اس طرح اسی موضوع پر مزید تحقیق کے دروازے کھلے رہتے ہیں۔

فہارس (Indexes)

مقالہ میں مندرجہ ذیل فہارس مرتب کی جائیں :

- اعلام
- 1-فہرست آیات قرآنیہ
2-فہرست احادیث مبارکہ
3-فہرست
4-فہرست اماکن
5- فہرست اصطلاحات/قواعد فقہیہ
6- فہرست مصادر و مراجع

- فہرست مصادر و مراجع میں صرف ان کتب کو لکھا جائے جن سے مقالہ کی تیاری میں براہ راست استفادہ کیا گیا ہے۔
- فہرست آیات مبارکہ کو ترتیب توقیفی کے مطابق جبکہ دیگر فہارس کو حروف تہجی کے مطابق مرتب کیا جائے۔
- مخطوطات، رسائل و جرائد کو مطبوعات کی فہرست سے الگ رکھا جائے۔ نیز مخطوطات و مطبوعات کی فہرست مصنف وار حروف تہجی کے لحاظ سے ترتیب دی جائے۔
- اگر مطبوعات کی فہرست طویل ہے اور کتابیں مختلف موضوعات پر مشتمل ہیں تو انہیں موضوعات کے اعتبار سے تقسیم کر دیا جائے۔

جلد بندی

جلد بندی کے لئے مندرجہ ذیل امور پیش نظر رکھے جائیں گے۔

1. جلد کے مرکزی صفحے پر ان تمام چیزوں کا اندراج اسی ترتیب سے کیا جائے جو سرورق میں دی گئی ہیں۔
2. پی ایچ ڈی کے مقالات کی جلد کا رنگ میرون (Maroon)، ایم فل کے مقالات کی جلد کا رنگ سبز (Green) ہو گا اور بی ایس کے مقالات کی جلد کا رنگ سیاہ (Black) ہو گا۔
3. مقالہ کے پشتے پر عنوان مقالہ ، مقالہ نگار کا نام اور سیشن درج ہو گا۔
4. مقالہ صفحہ کے دونوں اطراف پرنٹ کیا جائے۔

Afterword and Acknowledgements

As an afterword, we put forth that on March, 2023, we were given a daunting task of amending the 'Guidelines for Proposal/Synopsis & Thesis Preparation-2014' and devising newer guidelines. The committee convened multitude of meetings, and an extensive exercise was carried out with utter care of taking almost every department/faculty of IUB in consultation. Suggestions were gathered from focal person(s) of each department/faculty of IUB and were fairly incorporated, if deemed appropriate.

The aim, in fact, was to devise a comprehensive draft which could cater a framework for all departments/faculties of IUB which may be implemented across the IUB for quality purposes, and as a uniformity tool. Resultantly, the newer '**IUB Theses/Synopses Guidelines-2023**' are hereby being presented which have been devised while taking following factors in perspective:

- Green Policy of IUB
- Global Science Writing Trends

We extend our gratitude and appreciation towards all the committee members for providing their untiring efforts and valuable input in devising/drafting these guidelines. Our special regards go out to Prof. Dr. Abdul Ghaffar, Chairman Department of Fiqh and Shariah, IUB for his insight in Urdu, Persian, Arabic, Saraiki *etc* version of this draft.

Outside the domain of the Committee for Revamping and Implementation of IUB Guidelines for Proposal/Synopsis & Thesis Preparation, we are truly grateful to Dr. Zia-Ur-Rehman, Associate Professor, Department of Physiology, IUB for his insightful details provided for devising Methodology of an ideal thesis which are the mainstay of this draft.

The team of Directorate of Advanced Studies and Research, IUB, especially Mr. Muhammad Zulqarnain Asab, Deputy Director, Advanced Studies and Research, under the spearheading of Prof. Dr. Asif Naveed Ranjha needs avid gratitude as they went through all the codal formalities in getting this draft approved from relevant approving bodies of the IUB.

We anticipate a chance of improvement and betterment in this draft considering the ever-changing global research trends, and are always open to future suggestions as well.

It is hoped that these guidelines will enhance research output in a directional way.
